

Section 0

Week of January 28

Outline

- Introduction
- Git
- HTML
- CSS
- Project 0

Introduction: About Me

Elle Buellesbach

Senior in Computer Science, Yale University

elle.buellesbach@yale.edu

Office Hours: Tuesdays 12-3PM EST

Section: Wednesdays 11-12:30PM EST

Introduction: Zoom

- Keep microphones muted unless speaking
- Questions:
 - Use the chat box OR
 - Indicate you'd like to ask a question via chat box and unmute yourself
- Breakout rooms
 - Use for office hours

Introduction: The Course

- Project 0 due Monday February 11th
- All sections will be recorded and posted within 48 hours
- All office hour times and sections posted on the website
- CS50 Discourse for discussion

Expectation for section:

- Watch the lecture released on the Monday prior
- Read the project specification
- All section files will be found at
<https://github.com/ebuellesbach/2019cscie33>

Git: Version Control

Features:

- Track changes of code
- Synchronizes code between different people or projects
- Revert to old versions of code
- Can test new features without losing the original

Common commands:

`clone`

`add`

`commit`

`push`

`pull`

Keywords: Remote, local, repository

HTML

- HyperText Markup Language
- Allows for the formatting of text (markup language) for websites

Keywords: tag

HTML Links

```
<a href=[URL or Filename]> Click Me! </a>
```

Example file structure:

```
📁 2019cscie33
  📁 section_0
    📄 index.html
    📄 page2.html
```

Keywords: directory

Document Object Model

- How HTML is organized
- This was referenced in the first lecture as DOM and will be important for later weeks to make pages more dynamic

Keywords: child, sibling, parent, element

`<header>`

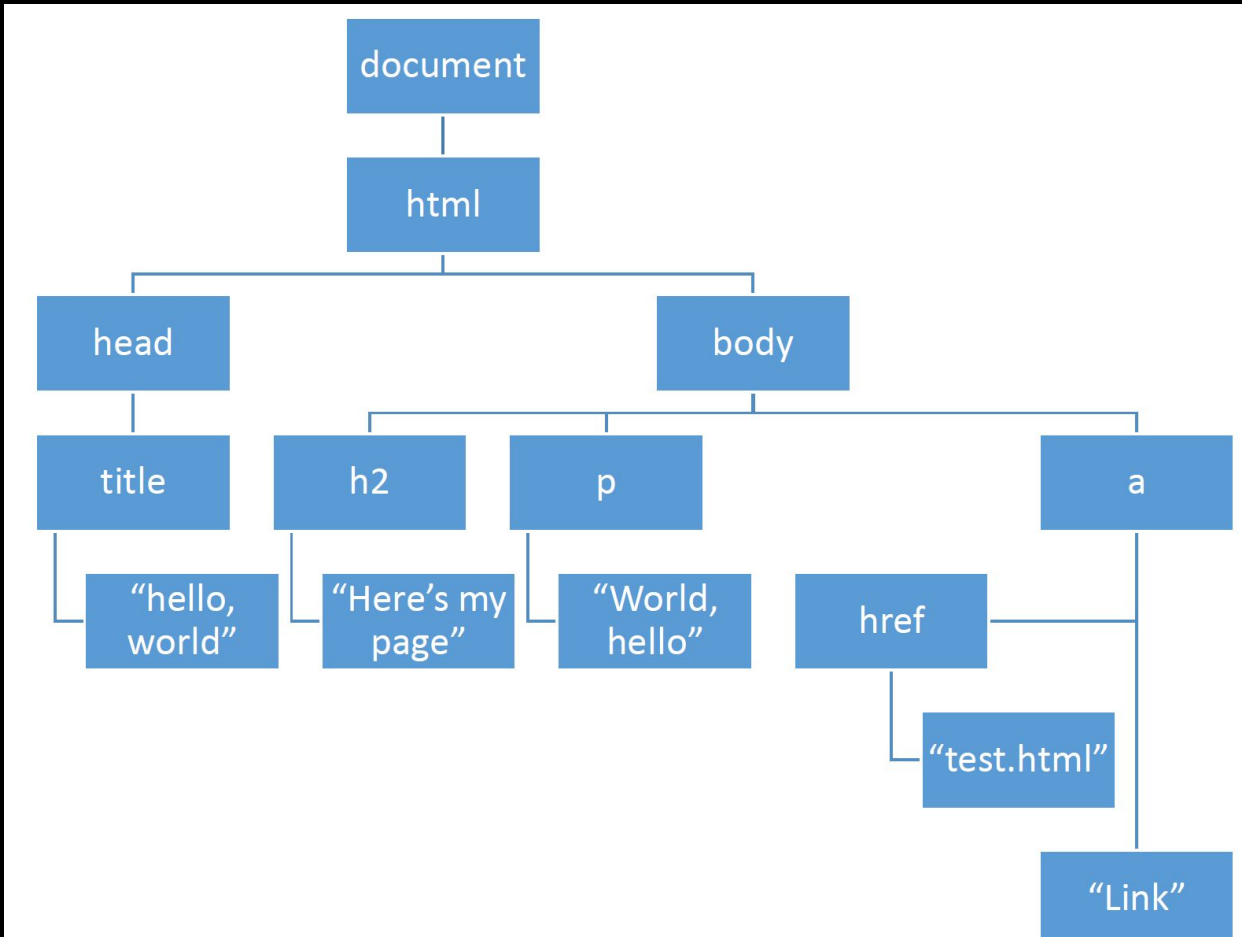

`<nav>`

`<main>`

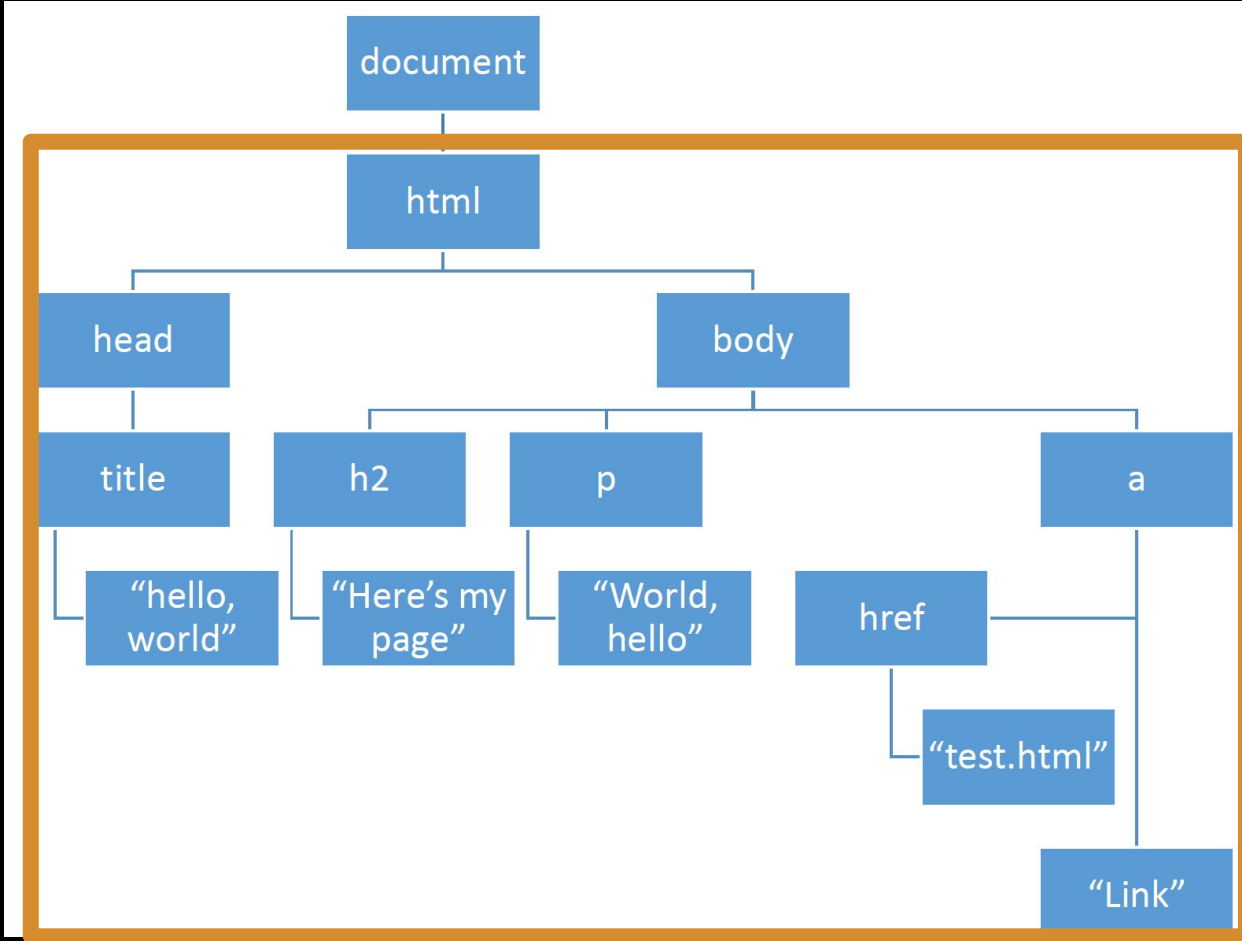

`<aside>`

`<footer>`

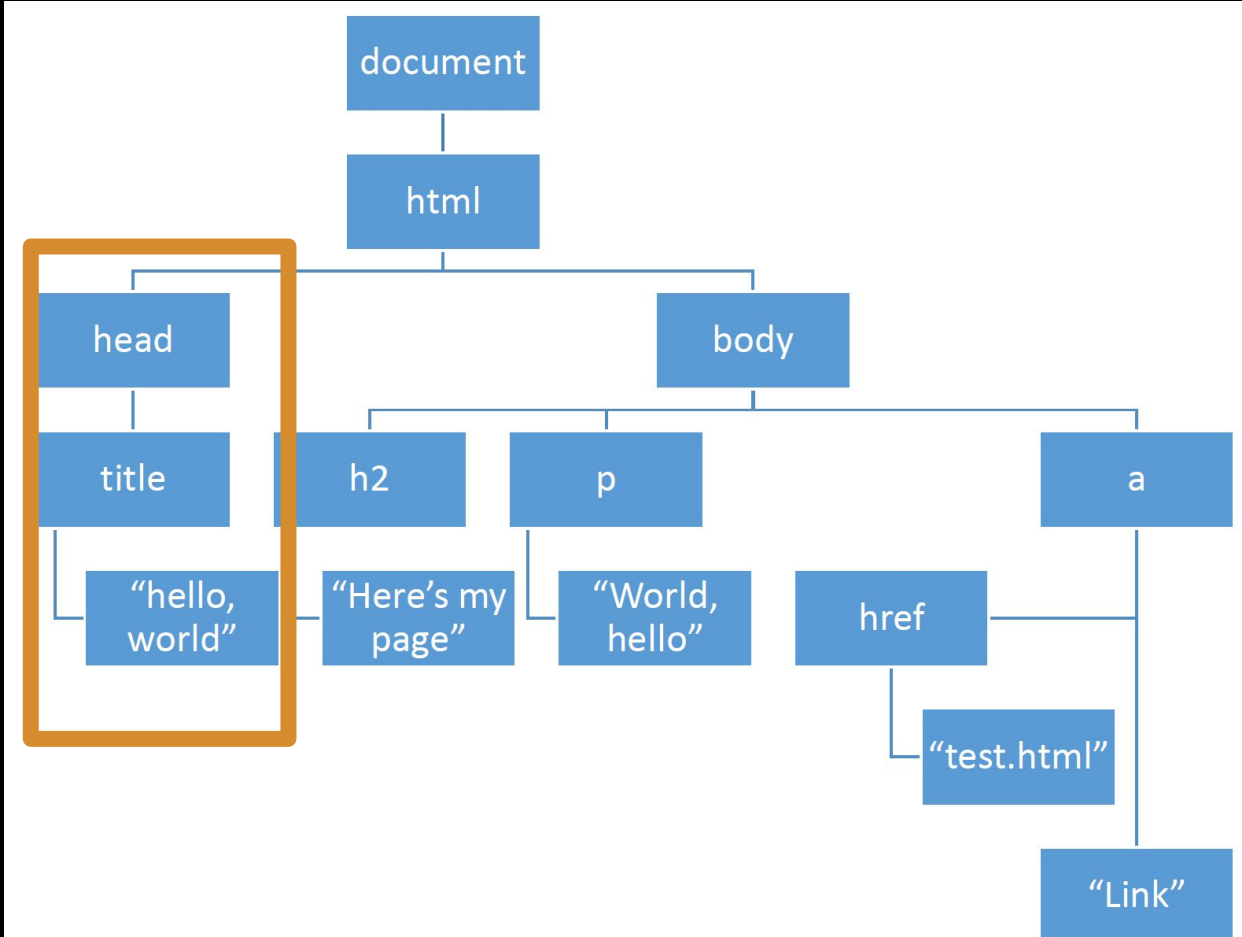

```
<html>
  <head>
    <title>Hello, world</title>
  </head>
  <body>
    <h2>Here's my page</h2>
    <p>World, hello</p>
    <a href="test.html">Link</a>
  </body>
</html>
```

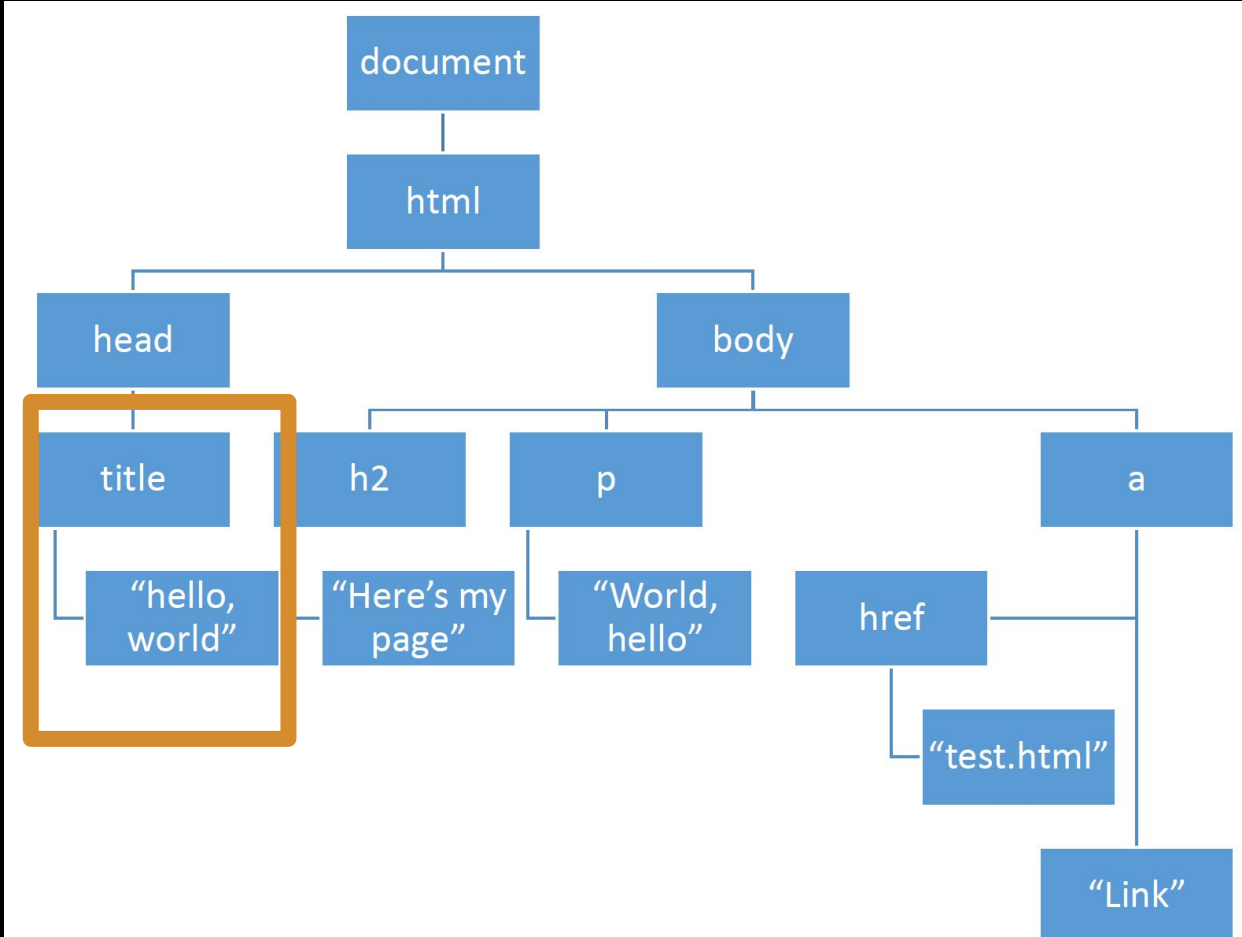

```
<html>
  <head>
    <title>Hello, world</title>
  </head>
  <body>
    <h2>Here's my page</h2>
    <p>World, hello</p>
    <a href="test.html">Link</a>
  </body>
</html>
```

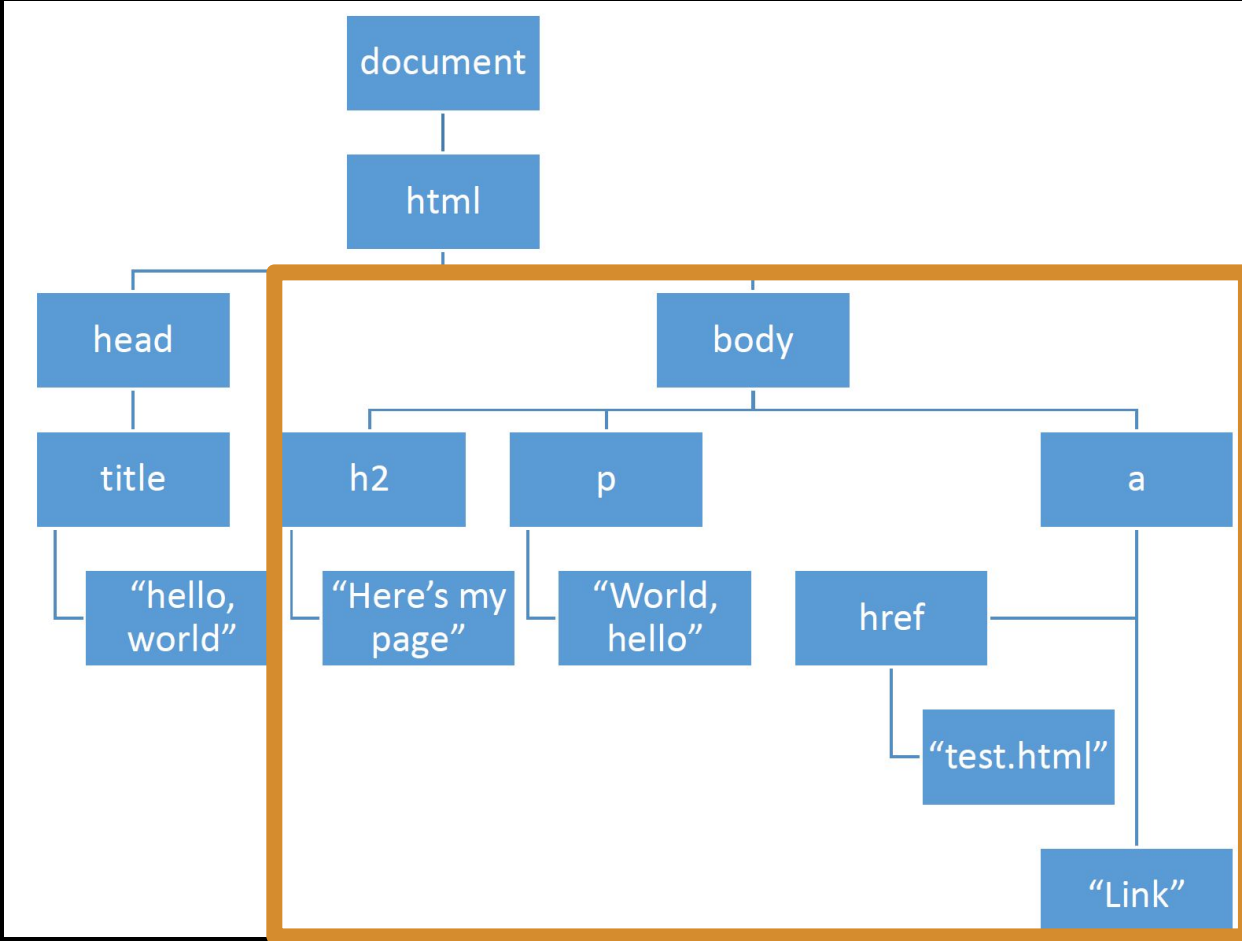

```
<html>
  <head>
    <title>Hello, world</title>
  </head>
  <body>
    <h2>Here's my page</h2>
    <p>World, hello</p>
    <a href="test.html">Link</a>
  </body>
</html>
```

```
<html>
  <head>
    <title>Hello, world</title>
  </head>
  <body>
    <h2>Here's my page</h2>
    <p>World, hello</p>
    <a href="test.html">Link</a>
  </body>
</html>
```

```
<html>
  <head>
    <title>Hello, world</title>
  </head>
  <body>
    <h2>Here's my page</h2>
    <p>World, hello</p>
    <a href="test.html">Link</a>
  </body>
</html>
```

```
<html>
  <head>
    <title>Hello, world</title>
  </head>
  <body>
    <h2>Here's my page</h2>
    <p>World, hello</p>
    <a href="test.html">Link</a>
  </body>
</html>
```

Cascading Style Sheets: CSS

- A way to add style to the HTML pages
- Generally best practice, have a separate CSS and HTML file
 - Link put into the <head> tag

```
<link rel="stylesheet" href="styles.css">
```

- Class selector: .
- ID selector: #

Keywords: selector

Advanced CSS and HTML

a, b	Multiple Element Selector
a b	Descendant Selector
a > b	Child Selector
a + b	Adjacent Sibling Selector
[a=b]	Attribute Selector
a:b	Pseudoclass Selector
a::b	Pseudoelement Selector

Any remaining questions?
